

# Archive Fever: A Freudian Impression (Religion and Postmodernism Series)

In *Archive Fever*, Jacques Derrida deftly guides us through an extended meditation on remembrance, religion, time, and technology--fruitfully occasioned by a deconstructive analysis of the notion of archiving. Intrigued by the evocative relationship between technologies of inscription and psychic processes, Derrida offers for the first time a major statement on the pervasive impact of electronic media, particularly e-mail, which threaten to transform the entire public and private space of humanity. Plyng this rich material with characteristic virtuosity, Derrida constructs a synergistic reading of archives and archiving, both provocative and compelling. Judaic mythos, Freudian psychoanalysis, and e-mail all get fused into another staggeringly dense, brilliant slab of scholarship and suggestion.--The Guardian[Derrida] convincingly argues that, although the archive is a public entity, it nevertheless is the repository of the private and personal, including even intimate details.--Choice Beautifully written and clear.--Jeremy Barris, *Philosophy in Review* Translator Prenowitz has managed valiantly to bring into English a difficult but inspiring text that relies on Greek, German, and their translations into French.--Library Journal
