

CyberWar Vengeance

CyberWar Vengeance is a techno-thriller, a timely and chilling warning about Americas vulnerability to a terrifying new method of attack--CyberWar. CyberWar Vengeance uses the emerging sciences as with Daniel Suarezs novels and the military action of Tom Clancys novels. Cyber-terrorists start a global cyberwar to get the cure for a worldwide pandemic. The cyber-terrorists attacks start a cycle of cascading battles in cyber space that result in worldwide destruction without a rocket or bomb, without a tank or plane. Americas Cyber Command, the FBI, the National Security Agency, the White House and its allies across the globe coordinate a counter attack but fail. The cyber-terrorists demand that the nations of the world surrender to them. The world surrenders but a small team continues the fight against an enemy that has total cyber dominance: Can see all, can know all. CyberWar Vengeance gives an accurate description of the computer-to-computer cyberwar that exists, and without warning could result in escalating world catastrophes. It is set in the very near future with improved, existing technologies -- quantum computers, DNA computers, ram jets, energy guns, drones and EMP fields. Current news is rife with stories about cyber invasions of corporate America, industrial cyber-attacks, identity theft, privacy hacking, Stuxnet worms, and Chinese military cyber units. Existing technologies will grow and strengthen, which will make CyberWar Vengeance a very likely future. (Authors Note: This is not Science Fiction but Science Future. All the technologies mentioned exist. Look them up!)
