

# On the Origins of Cognitive Science: The Mechanization of the Mind (MIT Press)

The conceptual history of cognitive science remains for the most part unwritten. In this groundbreaking book, Jean-Pierre Dupuy -- one of the principal architects of cognitive science in France -- provides an important chapter: the legacy of cybernetics. Contrary to popular belief, Dupuy argues, cybernetics represented not the anthropomorphization of the machine but the mechanization of the human. The founding fathers of cybernetics -- some of the greatest minds of the twentieth century, including John von Neumann, Norbert Wiener, Warren McCulloch, and Walter Pitts -- intended to construct a materialist and mechanistic science of mental behavior that would make it possible at last to resolve the ancient philosophical problem of mind and matter. The importance of cybernetics to cognitive science, Dupuy argues, lies not in its daring conception of the human mind in terms of the functioning of a machine but in the way the strengths and weaknesses of the cybernetics approach can illuminate controversies that rage today--between cognitivists and connectionists, eliminative materialists and Wittgensteinians, functionalists and anti-reductionists. Dupuy brings to life the intellectual excitement that attended the birth of cognitive science sixty years ago. He separates the promise of cybernetic ideas from the disappointment that followed as cybernetics was rejected and consigned to intellectual oblivion. The mechanization of the mind has reemerged today as an all-encompassing paradigm in the convergence of nanotechnology, biotechnology, information technology, and cognitive science. The tensions, contradictions, paradoxes, and confusions Dupuy discerns in cybernetics offer a cautionary tale for future developments in cognitive science.

SERVING PHOENIX, AZ AND SURROUNDING AREAS At Chelle Law, our experienced and highly skilled attorneys provide exceptional representation in CRIMINAL, DUI and PROFESSIONAL LICENSE DEFENSE. Our firm provides aggressive representation, individualized attention, and exceptional skill, all at a reasonable price. We Fight To Preserve Your Rights In a civil case the plaintiff carries the burden of proof and must demonstrate their version of the facts to be true by a preponderance of evidence. However, a criminal defendant is presumed innocent until proven guilty beyond a reasonable doubt. Thus, the burden of proof is very high for the prosecutor in criminal cases, thus you should contact our Phoenix Criminal Defense Attorneys as soon as possible. Aggressively Representing Businesses, Employees, and Individuals in Arizona Our clients range from accountants to physicians to nurses and every other profession in between. No matter the client, we are fully committed to providing each with unmatched service and a guarantee to aggressively represent their interests.
